Policy title	Category
Student Health Services Use by Faculty and Staff	Human Resources
Owner	**Approved by**
Human Resources	Business and Human Resources Offices

Policy statement

Faculty and staff will be seen by the nurse or physician for:

- Initial treatment (not for chronic medical care or a prolonged condition);
- Referral by the Human Resource Office of an on-the job injury;
- Wellness and preventative services (e.g., blood pressure checks, throat cultures, weight checks);
- Minor treatments of non-work related illnesses which will save the employee's time otherwise requiring treatment at an off-campus facility. Services are for employees only, not for dependents.

Questions about this policy and implementation procedures should be referred to Student Health Services.
